

**Student
Enrichment
Services Ltd.**

Student Enrichment Services Ltd was founded in 1985 in Brisbane, Australia by Rory Mulvey, a graduate of University College Dublin. The first achievement of the company was to develop their flagship Study Skills seminar (“**Success in School**”), which quickly became recognised as the “market leader” in this specialist area of education.

Rory returned to Ireland in 1994 and has since continued to develop this unique study skills programme. **SES** is now invited into more than 350 schools and colleges throughout Ireland each year, to instruct students in these innovative learning techniques.

Ongoing research and development, by secondary school teachers and educational administrators, has lead to the further development of **a range of new and diverse courses** specifically designed for school students of all age levels.

Staffs involved in presenting **SES** courses are all experienced secondary school teachers, trained in the **SES** methods and selected for their ability to motivate and communicate effectively with students.

A full list of courses offered is available on:

Half Day Seminar
for Sixth Class Students

“TRANSITION FROM PRIMARY TO SECONDARY SCHOOL”

Student Enrichment Services Ltd

214 Whitecliff, Rathfarnham, Dublin 16

Phone: (01) 4947927

Email: info@studentenrichment.ie

Web: www.studentenrichment.ie

A motivating seminar designed specifically to assist Sixth Class pupils with their study techniques!

THE COURSE COVERS THE FOLLOWING TOPICS:

HOW TO MANAGE THEIR TIME:

We assist each student in the construction of a simple study / homework timetable. We also discuss the importance of doing their homework correctly, not just copying out the textbook!

HOW TO TAKE NOTES PROPERLY:

Students work through exercise sheets, with our teacher, which introduces them to the basic concepts of note taking. This invaluable skill will save hours of study time!

OUR PROVEN METHOD OF STUDY:

Perhaps the most important session of the seminar; we show students how to study effectively into their long term memory.

WHAT TO EXPECT IN SECONDARY SCHOOL:

We will spend a short time discussing the concept of having many different teachers for the different subjects; the new level of expectations and the assessment procedures and examinations.

Fun!

Enjoyable!

Interesting!

MEMORY TECH- NIQUES:

Simple, clever techniques on ways to improve the students ability to recall information!

Practical, realistic
tips and advice!

“Learning how
to Learn!”
